

Job Title: Software Engineer

Location: Birmingham

Allsee has an exciting new opportunity for an enthusiastic person to join our ever-expanding team. We are now seeking a Software Engineer to help in the development and programming of apps and Android media players. This is a great prospect for the right candidate to work for a fast growing and dynamic company within the Digital Signage Industry. You will be part of a young team, helping to develop the software framework across multiple platforms.

Allsee has quickly developed into a market leading Digital Advertising Display Manufacturer with an impressive BlueChip client portfolio. Our success has been driven by our professional approach, dedication to customer service and a willingness to go the extra mile to achieve results – these are, therefore, key attributes we would look for in prospective employees.

Main Responsibilities

- Participate in the research, design and implementation of web apps.
- Responsible for web apps performance improvements in user experience.
- Assist the maintenance team to provide technical support and feedback.
- Write relevant technical documents based on development specifications and project procedures.

Key Competencies

- Bachelor's degree or above in Computer Science/Mathematics or relative degree subjects.
- Development experience of web apps using React/Vue/Angular.
- Back-end development experience with Java or other programming language.
- Good communication skills with fluent English speaking. (Chinese Mandarin speaking is okay too.)

Salary:

Negotiable based on working experience, recent graduates are also welcomed.

To apply for this role please send your CV and cover letter to hr@allsee-tech.com
